

IVYAR GOVERNANCE PLATFORM

Military Procurement Governance

Legal, Ethical & Compliance Framework

/ Ministerial Briefing

Version 1.0 | December 2025

Prepared for: Ministry-level stakeholders, auditors, international partners
Prepared by: IVYAR Governance & Compliance Division

1. Executive Summary

This document defines the legal, ethical, and governance framework for military procurement and describes the role of IVYAR as an institutional system of transparency, compliance, and audit. It is designed for ministries, state agencies, auditors, and international partners.

Key Points:

- **IVYAR does not conduct procurement** — it provides governance infrastructure
- **Legal compliance** — national law, international treaties, export control, sanctions
- **Ethical oversight** — Gospel Golden Rules, humanitarian principles
- **Full auditability** — immutable logs, explainability graphs, evidence chain
- **International alignment** — ITAR, EAR, EU Dual-Use, NATO standards

2. Role of IVYAR

IVYAR acts as an institutional governance layer that ensures legal clarity, ethical integrity, auditability and transparency of military procurement — without being a participant in the procurement process itself.

Function	Description
Legal Control	Document verification, export control checks, sanctions screening
Ethical Control	Gospel Golden Rules application, conflict detection, humanitarian review
Audit & Transparency	Immutable logs, explainability graphs, audit preparation
Training	Academy for operators, auditors, partners; crisis simulations

3. Legal Invariants

Invariant	Description
National Legislation	Compliance with applicable national law and defence procurement regulations
International Treaties	Respect for binding international agreements and security commitments
Export Control	ITAR, EAR, EU Dual-Use and other applicable export control rules
Sanctions	International and national sanctions lists and restrictions
No Circumvention	No bypassing of legal or regulatory requirements

4. Ethical Invariants

Principle	Meaning
Do No Harm	Minimize unintended harm to civilians and humanitarian operations
Proportionality	Capabilities proportionate to legitimate defence needs
Transparency	Explainable to authorized oversight bodies
Responsibility	Actors remain accountable; IVYAR supports but does not replace
Gospel Golden Rules	Treat others with fairness and dignity

5. Compliance Engine 3.0

Compliance Engine 3.0 applies a constitutional, explainable and auditable control layer to every eligible military procurement decision.

Component	Function
LegalGuard 3.0	Checks against national law, export control, and sanctions
Risk Engine 3.0	Evaluates legal, ethical, reputational, international risks
Ethical Engine	Tests decisions against ethical invariants and Gospel Golden Rules
Drift Detector	Detects deviations from policies, legal baselines, ethics
Evidence Chain	Immutable log of events, decisions, explanations
Audit Interface	Views and exports for internal, ministerial, international audits

6. Evidence Chain

The Evidence Chain is the backbone of trust: a tamper-resistant, time-ordered record of what was known, considered, and decided.

Element	Role
Event Log	Captures all key actions and status changes
Explainability Graph	Shows how rules, risks and ethics led to a decision
ZIP/Manifest Export	Bundles evidence with checksums for external audit

7. International Alignment

Military procurement governance in IVYAR is designed to support cooperation with allies, international organizations and oversight bodies.

- Clear mapping to export control and sanctions regimes (ITAR, EAR, EU Dual-Use)
- Transparent audit trails accessible to authorized international partners
- Shared ethical language grounded in Gospel Golden Rules and humanitarian standards
- Integration with NATO procurement standards and OECD anti-corruption guidelines

8. Conclusion

IVYAR ensures transparency, ethics and legal compliance of military procurement without being a participant in the procurement process. The system operates as an institutional governance layer that guarantees accountability and international trust.
